

# RUBBER RESOURCE, INC.

## New Single Knife Roll Slitting Service

Our new Lever 6200 machine will cut practically every type and density of roll stock material accurately, cleanly and quickly right from the master roll without rewinding.

We can automatically slit a wide variety of materials such as: tape, (pressure sensitive adhesives) release liners, foam, foil, film, laminates, rubber, fabric, nonwovens, paper and cork.

Material roll width— Maximum 65”  
Maximum roll outside diameter—20”  
Rolls to be supplied on 3” ID cores  
Slit widths of .125” to 60” Tolerances of +/- .02”  
Material determines slitting width and tolerances.

Contact us for a quote today on your material slitting requirements.
